COMMENTS FROM THE TOWN MANAGER'S OFFICE

Two representatives of the Maine Aeronautics Commission were in Bethel last Friday to inspect the airport. The inspection was made and the airport meets all of the specifications of a commercial airport. The Commercial Airport License has been received. The inspectors had not seen the airport since the improvements were completed late last fall. They were both very impressed by the amount of work that had been done and it is quite possible that the town will receive some state money to further improve the airport.

The airport now has 2500 feet of graded strip that is 100 feet wide. The number of planes at the airport varies from five to nine with the prospect of another four or five being purchased. There is a great deal of interest in the airport and a lot of activity. It seems that Sunday is the busiest day with a lot of planes and visitors at the strip. It is just a short distance from town, across the road from the Riverside Cemetery on the Northwest Bethel Road, and everyone is invited to look the airport over. I believe that some people might be quite surprised.

The highway crew has been kept quite busy the past few days working on plugged sewers. Two more manholes have been constructed on Park Street. There is a large volume in that line because it starts on Paradise Street and a lot of new connections have been made the last few years. There is also a lot more water used with the new appliances. Therefore a plug on that line will fill a lot of cellars in a short time.

Michael Houlihan

William Kiehn of Woburn, Mass., spent the week end at Mrs. E. O. Donahue's. Mrs. Kiehn and children, who visited her mother last week, returned home Sunday.

CONSERVATION SCHOOL TO OPEN MAY 11

Maine's Conservation School at Bryant Pond will open May 11 for its eighth season of instructing teachers—and now teaching undergraduates also, according to an announcement by the Fish and Game Department.

Eighteen school groups have taken one-week courses there since the opening. The youth program develops awareness of Maine's natural resources and the need to make the wise use of them, School Director Frank Downie said.

Students from Dixfield will spend the first week at the school this year, followed by groups from Waterville, Farmington and Farmington State Teachers College. Groups from Lewiston, Auburn and FSTC will attend in the fall.

During the summer, regular workshop sessions are held for teachers, who receive college credit for their work. Grange and 4-H units also use the campus.

Power line conductors hampered the fire fighters in reaching the buildings with the motorized equipment.

POPPY DAY - 1964

To rekindle the flame of remembrance for those brave men and women who died in defense of America; to help those who, though living, gave their health and strength in three mighty conflicts; this is the story of Poppy Day, 1964. For gratitude couples with the desire to serve, is a thread which runs glowing and constant through the years-long tradition of Poppy Day.

Poppy Day is ever new, new in terms of increasing devotion to welfare of our disabled veterans and their families; new in reaffirmation of heartfelt gratitude to those who gave their lives in protecting our way of life; new in growing dedication to volunteer service aimed at strengthening our free heritage. These basic tenets of American Legion Auxiliary work are at the heart of every annual Poppy Day observance.

Gratitude for the hard-earned freedoms for which thousands of fighting men gave their lives led Auxiliary members more than four decades ago to establish the first Poppy Day as a tribute to our war dead. The brilliant scarlet poppy which grew in profusion in the battlefields of France and Flanders in World War I was chosen as the symbol of this memorial event celebrated in most communities throughout the nation in the week before Memorial Day.

Poppy Day in Bethel will be observed on Friday and Saturday, May 22 and 23, according to Mrs. Stephanie Thurston, president of Mundt-Allen Unit, of the Auxiliary which sponsors the event each year locally.

Poppies which will be distributed throughout the town by volunteer Auxiliary members on these dates have been fashioned by disabled veterans who receive payment for their work. Auxiliary members provide all material for making the poppies free of charge. All other work done in connection with the event is on a volunteer basis.

Contributions received by volunteer Auxiliary members who offer poppies to passersby on street corners on Poppy Day will be used exclusively for veteran rehabilitation and child welfare work. Most of the funds donated in this area remain here for veterans rehabilitation and child welfare work.

Disabled veterans numbering from 6,000 upwards begin their work of fashioning the poppies in the Autumn months preceding the observance of Poppy Day in the Spring. If they have never made the blossoms before they are taught by Auxiliary volunteers who spend over a million hours yearly in this and other services to hospitalized veterans. Payments to veterans for their work totals \$300,000 annually.

Poppies worn by 20 million Americans in annual tribute use 10,680 miles of crepe paper and 3,500 miles of wire.

Pasteurization is done in 10 seconds now where it used to take an hour. Another machine sterilizes the bottles in 15 minutes. If a person should put his hand inside this machine for a short time, it would be severely burned. When sealing the pasteurized cartons of milk a machine sucks the foam from the tops so it would not seal if left.

A picnic lunch was enjoyed by both clubs on their return. The next meeting of the Jolly Workers will be at Mrs. Rosenberg's May 15th. Reported by Paula Howe.
